

CURRICULUM VITAE

RAY HOBBS BSc, PhD, MIMarEST, CMarEng, CEng

A highly qualified senior geotechnical engineer with extensive, world-wide experience in site investigation, design appraisal, installation and certification of a full range of offshore structures. An active member of international code making and special-interest committees. Has acted as technical advisor to industry funded research projects. Chairman of Offshore Engineering Society 2001 – 2004

CAREER AND ACHIEVEMENTS TO DATE

Independent Geotechnical Consultant (July 2000 – date)

Projects performed as an independent consultant include, *inter alia*:

- planning and on-site supervision of offshore and nearshore geotechnical site investigations worldwide
- site supervision of pile driving in extremely hard boulder clays West of Shetland
- site supervision of offshore wind farm pile driving test in chalk
- site supervision for suction installed conductor anchor node
- expert witness in court case on jack-up failure
- review for lawyers and loss adjusters of failure of wind turbine grouted connections
- review of reports for loss adjusters regarding failure of onshore pipeline over mountainous terrain
- relief geotechnical engineer in a major oil company office in Paris for 10 weeks
- detailed QC review of reports for site investigation contractors and consultants
- review of conductor installation procedures in normally consolidated clays
- review of conductor / foundation interaction
- review and prediction of jack-up spudcan penetrations
- review of gravity base design concepts for southern North Sea platform
- review of verification aspects of foundation design for platform West of Shetlands
- review of preliminary pile design for southern North Sea platform
- review of calculation methods for pile capacity in clays
- selection of design parameters for drilled and grouted piles in Middle East
- review of remedial actions for driven piles failing to meet their target depths in India
- review of pipeline routing
- review of alternative anchoring methods
- review of pile drivability predictions
- assist in preparation of pile drivability studies

- assist in preparation of design guide and spreadsheets for gravity base foundations

Clients to date include:

ADTI, Advanced Geomechanics, Aker Kvaerner, Apache, W S Atkins, Bateman Chapman (loss adjusters), BG, BG Norge, BP, BOMEL, Centrica Renewable Energy Ltd, CNR International (UK), Coflexip Stena Offshore International, Conoco, ConocoPhillips Norge AS, Coogee Resources (Australia), Crescent Petroleum (Sharjah), Dana, DONG, EDR (Australia), Endeavour, EnCana, Fishburns Solicitors, Floyd & Associates, Fugro Engineers BV, Gardline, Gas de France, Genesis Oil and Gas, Holman Fenwick Willan (solicitors), Isis Energy, Larsen & Toubro (India), London Array Ltd, London Offshore Consultants (Middle East), London Marine Consultants, Maersk Olie og Gas AS, Maersk Oil Qatar, National Grid, NAM, NeoDrill, Noble Denton, Norwegian Geotechnical Institute (NGI), Paladin Resources (Norway), Petro-Canada Netherlands, PowerGen Renewables, Hydrosearch Associates, RPS Energy, RWE npower Renewables, Seacore, Senergy, Shell Expro, Statoil, Talisman UK, TENAS, Thales GeoSolutions (UK and Belgium), Thanet Offshore Wind, Technip, Tuscan Energy, Total, Unocal Netherlands, Valiant Petroleum, Vanguard Floating Production, Venture Production, Vryhof and Woodside Energy Ltd.

Current, active member of ISO and API committees for writing or updating geotechnical sections of API RP2A and ISO 19902 (fixed offshore structures), API RP2GEO and ISO 19901-4 (geotechnical & foundation design), ISO 19901-8 (marine soil investigations) and previously ISO 19905-1 and 19905-2 (jack-ups). Member of IOGP working group updating ISO standards. Member of BSI committee on offshore structures. Contributed to ISSMGE nearshore site investigation guidelines and to SUT Offshore Site Investigation and Geotechnics (OSIG) committee guidelines. Member of SUT OSIG committee, Offshore Engineering Society committee (Chairman 2001 – 2004), British Geotechnical Association executive committee (from 2004 – 2007 and 2016 – 2019) and IMarEST Technical Affairs committee (from 2006 - 2009). Member of organising committee and technical editor for SUT International Conferences on Offshore Site and Geotechnics 1992, 1998, 2002, 2007, 2012 and 2017. Member of organising committee for SUT/OES Offshore Windfarm Site Investigation Seminar 2003. Organiser and presenter of annual OES film evening at Institution of Civil Engineers, London since 2000

Head of Geotechnical Group, Lloyd's Register Offshore Engineering (1978-2000)

Responsible for geotechnical design appraisal and installation approval of offshore structures in a wide variety of water depths and ground conditions, under both certification and verification schemes.

Experience includes selection of design parameters from site investigation data and performance of independent calculations for

- driven or drilled and grouted pile foundations for several hundred structures at both soil and rock sites, including many with carbonate materials
- suction installed piles
- piled foundations for first tension leg platform
- foundations for concrete gravity platforms
- foundations for jack-up rigs, articulated columns, moorings, subsea frames
- foundations for jetties, linkspans
- rock fill causeway
- pipelines
- grouted pile - structure connections
- anchors.

Familiar with application and limitations of old and new methods for calculating axial pile capacity.

Member of peer assist team reviewing foundations options for geotechnically challenging site, west of Shetlands.

Won and executed externally funded research projects, on, *inter alia*,

- the effect of conductor and shallow well drilling on foundation soils
- review of axial pile load test data and implications for design of offshore piles in both clay and sand
- seabed scour around jacket structures
- vibrations of jacket structures during pile driving.

Executed funded research on

- the dynamic behaviour of gravity base structures
- review of foundation performance of Shell Brent B and experimental Christchurch Bay gravity base structures.

Wrote finite element program for elasto-plastic analysis of gravity platform foundations and axially loaded piles. Directed the writing of pile driving analysis program.

Acted as Lloyd's Register surveyor for the installation or repair of over 80 offshore structures, including fixed steel platforms, subsea frames, SPMs and a TLP. These were situated in the UK, Eire, Netherlands, Spain, Abu Dhabi, South Africa, India, The Philippines, People's Republic of China and Australia. Responsibilities included monitoring and approving pile installation, grouting and welding activities and issuing Inspection Release Notes.

Attended installation of geotechnical instrumentation for gravity platform and TLP.

Attended site investigations offshore UK, The Netherlands, Egypt and India, acting as client representative on some.

Project adviser for industry-funded axial load tests on large diameter driven piles

- in normally consolidated and overconsolidated clays in the UK (BP)
- in dense sand in the Netherlands (EURIPIDES).

Consultant to UK Department of Energy / HSE on same.

Member of

- Department of Energy Steering Group for Offshore Piling
- Committee for re-draft of Department of Energy Guidance Notes for Offshore Installations (Foundations and Site Investigations)
- BSI Committee on Draft for Development for Fixed Offshore Structures
- Canadian Standards Technical Committee S472
- ISO and API committees
- SUT Offshore Site Investigation and Geotechnics committee

Published and presented several papers on offshore and onshore geotechnics

Soils Engineer, Lloyd's Register Offshore Services (1974-1978)

Geotechnical design appraisal and installation approval of offshore structures

QUALIFICATIONS

Chartered Marine Engineer
Chartered Engineer, 1978
PhD in Engineering (Soil Mechanics), University of Manchester, 1974
BSc in Civil Engineering, 1st Class Honours, University of Manchester, 1971

CURRENT PROFESSIONAL MEMBERSHIPS

Institute of Marine Engineering Science and Technology (Chartered Engineer,
Chartered Marine Engineer, Technical Affairs Committee 2006 – 2009)
Offshore Engineering Society (committee member 2000 – present, Chairman 2001 - 2004)
British Geotechnical Association (executive committee member 2004 – 2007, 2016 - 2019)
Institution of Civil Engineers (graduate member)
Various ISO and API geotechnical committees and working groups including those that drafted
ISO 19901-8 (marine soil investigation) and ISO 19905-1 and 19905-2 (jack-ups)
Interim IOGP working group developing ISO standards
British Standards Institution committee B/525/12 on design of offshore structures
SUT Offshore Site Investigation and Geotechnics committee

CONTINUING PROFESSIONAL DEVELOPMENT

Regular attendee at technical meetings of Offshore Engineering Society, British Geotechnical Association, British Tunnelling Society, Society for Earthquake and Civil Engineering Dynamics, Geological Society of London, Institution of Civil Engineers, Institute of Marine Engineering Science and Technology, Royal Institute of Naval Architects, Society of Naval Architects and Marine Engineers, *etc.*
Committee memberships as above.
Attended Lloyd's Register Middle Management course and LR courses on NDE and IT

EDUCATION

University of Manchester

PhD in Engineering (Soil Mechanics) on numerical and centrifuge modelling of soil slopes. Included writing non-linear elasto-plastic finite element programs and using geotechnical centrifuge.
BSc in Civil Engineering. Final year specialisations in soil mechanics and hydraulics.
Awarded Institution of Civil Engineers Prize. Awarded runner-up prize in BGA Cooling Prize competition

Wallingford Grammar School

GCE A levels in Mathematics, Further Mathematics and Physics
Awarded Walter Bigg Prize for Physics

PUBLISHED PAPERS, DISCUSSIONS AND ARTICLES

- 2014 Guidance Notes for the Planning and Execution of Geophysical and Geotechnical Ground Investigations for Offshore Renewable Energy Developments, SUT (with others)
- 2012 Technical Editor: Proc. Offshore Site Investigation and Geotechnics Conference, SUT (with others)
- 2009 Discussion on: Observed Increases in Offshore Pile Driving Resistance, Proc. ICE, Geotechnical Engineering, 162, pp293-294
- 2007 Technical Editor: Proc. Offshore Site Investigation and Geotechnics Conference, SUT (with others)
- 2007 Offshore Site Investigation - Some Insights into the Role of a Client Representative, Proc. Offshore Site Investigation and Geotechnics Conference, SUT, September 2007
- 2004 Site Investigation Matters, Offshore Wind Section, UK Power, Issue 1, March, McMillan-Scott, p22
- 2002 Technical Editor: Proc. Offshore Site Investigation and Geotechnics Conference, SUT (with others)
- 1998 Technical Editor: Proc. Offshore Site Investigation and Foundation Behaviour Conference, SUT (with others)
- 1998 The Impact of Conductor and Shallow Well Drilling on the Safety of Offshore Foundations, Proc. Conference on Offshore Site Investigation and Foundation Behaviour - New Frontiers, SUT (with DWF Senner)
- 1994 Drilling and Conductor Installation Effects on Foundation Safety, Health & Safety Executive Report OTO 94 005 (with DWF Senner)
- 1994 Discussion on: Mechanisms of Shaft Friction in Sand from Instrumented Pile Test, ASCE Journal of Geotechnical Engineering, 120:8, p1449
- 1993 Foundations Problems Encountered During The Installation of Piled Offshore Structures - A Certifying Authority's Experiences, Proc. Offshore '93 Conference (with JL Price)
- 1993 Technical Editor: Proc. Offshore Site Investigation and Foundation Behaviour Conference, SUT (1992) (with others)
- 1993 A Review of Design and Certification of Offshore Piles with Reference to Recent Axial Pile Load Tests, Proc. Conference on Offshore Site Investigation and Foundation Behaviour, SUT (1992)
- 1993 The Impact of Axial Pile Load Tests at Pentre and Tilbrook on the Design and Certification of Offshore Piles in Clay, Proc. Conference on Recent Large Scale Fully Instrumented Pile Tests in Clay, ICE, London, pp 491 - 510
- 1992 Pile Driving Vibrations Database, Health & Safety Executive Report OTO-92-008 (with J Waller)
- 1989 Certification of Offshore Structures Founded on Carbonate Soil, Proc. 8th Conference on Offshore Mechanics and Arctic Engineering, Vol. 1, pp 541 - 548 (with JL Price)
- 1986 Discussion on: Reinterpretation of the West Sole Platform "WC" Pile Load Tests, Geotechnique, 35:3, pp 461 - 462
- 1984 Discussion on: Scale Effects of Ultimate Pile Capacity, Proc. ASCE, 110:GT, pp 1155 - 1156
- 1983 Discussion on: Effective Stress Capacity Model for Piles in Clay, Proc. ASCE, 109:GT, pp 1213 - 1214
- 1980 Discussion on: Installation of the Piled Foundation and Production Modules on Occidental Piper A platform, Proc. ICE

- 1979 Elasto-Plastic Finite Element Analyses of Axially Loaded Piles in Clay, Proc. Conference on Numerical Methods in Offshore Piling, ICE, London, pp 191 - 195
- 1979 Discussion on Pile Drivability, Proc. International Conference on Numerical Methods in Offshore Piling, ICE, London, pp 177 - 178
- 1979 Report on Informal Discussion: Computer Graphics in Civil Engineering, Proc. ICE, 1:66, p 806
- 1979 Discussion on the Dynamic Response of Gravity Platforms, Offshore Geotechnical Research, Proc. of Symposium held at BRE
- 1978 An Investigation into the Dynamic Response of Gravity Platforms with Emphasis on Foundation Behaviour, Department of Energy report OT-R-7840 (with AD Coates and CA Bainbridge)
- 1978 Some Applications of Numerical Methods to the Design of Offshore Gravity Structure Foundations, Numerical Methods in Offshore Engineering, Editors Zienkiewicz, Lewis and Stagg, Ch14, pp 452 - 482 (with PJ George and GGW Mustoe)
- 1977 Analytical and Field Data Studies of the Dynamic Behaviour of Gravity Offshore Structures and Foundations, Offshore Technology Conference, Paper OTC 3008 (with PGH Shaw, AD Coates and WS Schumm)
- 1976 Discussion on: Consolidation Analysis of Layered Anisotropic Foundations, International Journal of Numerical & Analytical Methods in Geomechanics, Vol.1, p 407
- 1976 Biot Analysis of Consolidation Beneath Embankments, Geotechnique 26:1, pp 149 - 171 (with IM Smith)
- 1976 Discussion on: Settlement and Stability of Embankments Constructed on Soft Alluvial Soils, Proc ICE, 2:61, pp 604 - 606
- 1975 Finite Element Analyses of Centrifuged Soil Slopes, PhD Thesis, University of Manchester
- 1974 Finite Element Analysis of Centrifuged and Built-up Slopes, Geotechnique 24:4, pp 531 - 559 (with IM Smith)

OFFSHORE & SITE VISITS

As Lloyd's Register engineer:

	DATES	PROJECT	LOCATION	CONTRACTOR	VESSEL	PURPOSE
1976	15/02 - 19/02	Occidental Flotta SPM	UK	Micoperi	PM 40	Lateral load test
	24/03 - 30/03	Occidental Piper A	UK	McDermott	on platform	Drilled pile installation
	24/03 - 30/03	Occidental Piper A	UK	Fugro-Cesco	on platform	Site investigation
1977	30/06 - 06/07	BP West Sole	UK	Wimpey	Transocean 4 jack-up	Remedial pile installation
	10/02 - 16/02	Shell Inde L	UK	Heerema	Thor	Platform installation
	26/02 - 14/03	Shell Castellon B5 SALS	Spain	Nautilus	Staflo	Installation, including drilled piles
